## EXECUTIVE SUMMARY

Data on sexual orientation and gender identity (SOGI) are essential for understanding the characteristics of lesbian, gay, bisexual, and transgender (LGBT) populations in the United States. However, on the first day of his second term, President Donald Trump issued an executive order that declared it was official policy of the administration that transgender, nonbinary, and intersex identities would not be recognized by the federal government. In response, federal agencies began removing gender identity questions, along with several other data elements related to LGBT communities, from a broad range of federal data collections.

Using primarily government sources, we identified the removal of at least one SOGI measure from approximately 360 different federal data collections. We consider this a conservative estimate and expect upward revisions as ongoing data reconciliation and discovery of additional removals continue. Additionally, we found:

- The majority (94%) of data elements removed from federal collections were gender identity demographic measures (n=338 collections). These changes were made largely pursuant to President Trump's Executive Order 14,168.
- At least 60 data collections also removed sexual orientation data elements. These actions were not explicitly mandated under Executive Order 14,168 or related implementation guidance.
- Twenty-three (23) collections removed SO and/or GI data elements from bias motivation questions, precluding the ability to report discrimination on these bases.
- Eighty-three percent (83%) of removals were made through non-substantive change requests made to the Office of Management and Budget (n=300). Very few collections were changed through the formal notice-and-comment process (n=34).
- These removals span multiple data collection types, including national surveys and surveillance systems, government-funded research studies, programmatic monitoring systems and evaluation studies, and administrative forms and records.

## INTRODUCTION

Data on sexual orientation and gender identity (SOGI) are essential for understanding the characteristics of lesbian, gay, bisexual, and transgender (LGBT) populations in the United States, assessing and addressing their needs, allocating public and private resources, and developing impactful policy at the local, state, and federal levels.<sup>1</sup> There is a long history of evidence building and methodological research supporting the collection of SOGI data at the federal level.<sup>2</sup> Under the Biden administration, the practice was widely adopted.<sup>3</sup>

On the first day of his second term, President Donald Trump issued an executive order that declared it was official policy of the administration that transgender, nonbinary, and intersex identities would not be recognized by the federal government.<sup>4</sup> In response, the Office of Management and Budget (OMB) issued guidance directing all federal agencies to conform their policies and programs to the executive order.<sup>5</sup> One effect of this directive was the systematic removal of gender identity measures, and in numerous cases, sexual orientation measures as well, from federal surveys, datasets, reports, and public websites.<sup>6</sup>

This report documents the removal of SOGI measures that have occurred since the start of the second Trump administration, specifically from late January 2025, when Executive Order 14,168 was announced, through late January 2026, the one-year anniversary of that announcement.

# FINDINGS

## REMOVAL OVERALL

Since January 20, 2025, approximately 360 federal data collections have removed a sexual orientation or gender identity measure. Most removals were from evaluation research and programmatic monitoring collections, with at least 100 collections each eliminating a sexual orientation or gender identity measure, followed by 78 administrative collections. Among major national and population-based collections, 63 removed a sexual orientation or gender identity measure. This includes 36 national surveys, three of which are government-funded private studies, and 27 surveillance systems (Table 1). See Appendix for a full list of collections where removals were identified.

Table 1. Count of federal data collections with SOGI measure removals overall, by collection type

FEDERAL DATA COLLECTIONS CONTAINING SOGI MEASURES	TOTAL COLLECTIONS	NATIONAL SURVEYS	POPULATION SURVEILLANCE	EVALUATION RESEARCH	PROGRAM MONITORING	ADMINISTRATIVE
Total data collections with SOGI removals	360	36	27	118	101	78
Confirmed removal	344	30	24	113	100	77
Presumptive removal*	16	6	3	5	1	1

Note: Total = Confirmed + Presumptive removals; \*Data collections without official documentation confirming removal of SOGI measures, but where removal is evident through other modifications, such as changes in public-facing published results.

## REMOVAL OF DEMOGRAPHIC MEASURES

Gender identity was the primary category of removed questions from federal data collections during the evaluation period. Of the 360 removals, 338 included gender identity. Overall, the majority of gender identity removals were one-step questions, though it varied by collection type. For instance, national surveys and evaluation research had implemented and ultimately removed more two-step than one-step gender identity questions, whereas programmatic monitoring and administrative collections mainly included and ultimately removed one-step gender identity questions. Approximately 15 collections that included “intersex” as a response option removed it (Table 2).

Among private studies that receive grant funding from the federal government, three have removed gender identity questions or published results on gender identity/transgender people. These include the General Social Survey (GSS), Population Assessment of Tobacco and Health Study (PATH), and Monitoring the Future (MTF).<sup>7</sup>

<sup>7</sup> NORC at the University of Chicago. (2025). General Social Survey (GSS): 2024 Codebook. <https://gss.norc.org/content/dam/gss/get-documentation/pdf/codebook/GSS%202024%20Codebook%20R2.pdf>, National Institutes of Health (NIH) & Westat. (2025). (2025). Monitoring the Future (MTF): 2024 Annual Report. <https://monitoringthefuture.org/wp-content/>

**Table 2. Count of federal data collections with gender identity demographic measure removals, by collection type**

REMOVAL OF DEMOGRAPHIC MEASURES	TOTAL COLLECTIONS	NATIONAL SURVEYS	POPULATION SURVEILLANCE	EVALUATION RESEARCH	PROGRAM MONITORING	ADMINISTRATIVE
Gender identity	338	33	26	111	99	69
1 step	194	14	14	19	87	60
2 step	144	19	12	92	12	9
Intersex response option*	15	1	4	2	5	3

Note: \*The majority of these collections included “intersex” as a response option when asking about sex assigned at birth.

Overall, 62 collections removed a sexual orientation measure, including sexual orientation as a demographic measure and as a motivation for bias: 50 removed a demographic sexual orientation measure, and an additional 12, which did not ask a demographic sexual orientation measure, removed sexual orientation as a reason for a bias-motivated incident (Tables 3 and 4). Among the 50 data collections that removed a demographic sexual orientation measure, seven were national surveys (Table 3). Specifically, these surveys were the American Survey of Mortgage Borrowers (ASMB), Survey of Earned Doctorates (SED), American Community Survey (ACS) Panel Test, Annual Business Survey (ABS), National Survey on Drug Use and Health (NSDUH), Health Center Patient Survey (HCPS), and the National Youth Tobacco Survey (NYTS).<sup>8</sup>

An additional seven collections removed a combined SOGI measure, such as a question asking, “Do you identify as a member of the LGBTQ community?” None of the collections that asked about same-sex partnership status removed those questions (Table 3).

**Table 3. Count of federal data collections with sexual orientation demographic measure removals, by collection type**

REMOVAL OF DEMOGRAPHIC MEASURES	TOTAL COLLECTIONS	NATIONAL SURVEYS	POPULATION SURVEILLANCE	EVALUATION RESEARCH	PROGRAM MONITORING	ADMINISTRATIVE
Sexual orientation	50	7*	5	14	17	7
Same-sex partnership	0	0	0	0	n/a	0
Combined SOGI measure	7	n/a	n/a	1	4	2

Notes: \* Includes one collection which kept a sexual orientation question but modified the response options from: "Straight or heterosexual, Gay or lesbian, Bisexual, pansexual, or queer, Asexual, I am not sure or I am questioning, I do not know what this question means, Something else not included here [Specify].", to: "Straight or heterosexual, Not heterosexual." See footnote 8 (CDC: NYTS, 2025); Combined SOGI measure = measures which combine sexual and gender minority status into one group, such as LGBTQ.

## REMOVAL OF REASONS FOR BIAS-MOTIVATED INCIDENTS

Among the 23 collections that removed the opportunity for respondents to attribute incidences of bias to their sexual orientation or gender identity, 22 removed gender identity and 15 removed sexual orientation as a response option (Table 4). There were a few instances in which gender identity was proposed for removal in a bias-motivated incident question, but the agency ultimately reinstated the question or response option. These revisions were attributed to statutory requirements. For example, we documented two proposed removals related to discrimination protections that were modified before becoming final: a non-substantive change request (NSCR) initially directed the removal of SOGI as bias motivations in the National Crime Victimization Survey (NCVS) and the Equal Employment Opportunity (EEO) Complaint Form; however, subsequent documentation rescinded that guidance.<sup>9</sup> We did not count these as "removals" in this analysis.

<sup>9</sup> The statutory requirement this is referencing is Title VII of the Civil Rights Act, which prohibits sex discrimination in employment. Title VII of the Civil Rights Act of 1964, 42 U.S.C. §§ 2000e - 2000e17 (as amended). In *Bostock v. Clayton Cty.*, 590 U.S. 644 (2020), the Supreme Court ruled that Title VII's protections extend to discrimination on the basis of sexual orientation and gender identity.; A March 3, 2025 NSCR stated, "BJS also requested the removal of a question which asks: *Do you think the offender was targeting you [or someone you live with] because of prejudice or bigotry toward your gender identity, including being transgender, intersex, or gender non-conforming?*... The Matthew Shepard and James Byrd, Jr., Hate Crimes Prevention Act of 2009 uses the term "gender" and "gender identity" as an actual or perceived characteristic that can be the basis for a hate crime. Given this federal law, the removal of this question is being reviewed by Office of General Council representatives at BJS, Census Bureau, and OMB. Until final guidance is provided, this question has been programmed by Census to be skipped." Morgan, R.E. (2025, March 3). *Memorandum: Non-substantive change request for the National Crime Victimization Survey (OMB Control No. 1121-0111)*. [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202503-1121-001](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202503-1121-001); Two months later, a new NSCR submitted on May 5, 2025 stated: The Matthew Shepard and James Byrd, Jr., Hate Crimes Prevention Act of 2009 uses the term "gender" and "gender identity" as an actual or perceived characteristic that can be the basis for a hate crime. The Census Bureau collects NCVS data on hate crimes to fulfill BJS's statutory requirement to report on Hate Crime Statistics under 34 U.S.C. 41305. Collecting these data is not in conflict with Executive Order 14168 titled "Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government." Morgan, R.E. (2025, May 5). *Memorandum: Non-substantive change request for the National Crime Victimization Survey (OMB Control No. 1121-0111)*. [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202504-1121-001](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202504-1121-001); "The removal of subcategories under "sex" specifying gender orientation and sexual orientation is being done in accordance with Executive Order 14168, "Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government" (Jan 20, 2025). Nonetheless, Treasury recognizes that *Bostock* prohibits discrimination based on sexual orientation and gender identity and confirms that employees can continue to file claims on those bases by indicating they have been discriminated against based on their sex." U.S. Department of Treasury. (2025, September 30). *Supporting Statement - Information Collection Request*. [https://www.reginfo.gov/public/do/PRAViewIC?ref\\_nbr=202504-1505-001&icID=230736](https://www.reginfo.gov/public/do/PRAViewIC?ref_nbr=202504-1505-001&icID=230736)

**Table 4. Count of federal data collections with SOGI removals from bias-motivated incident measures, by collection type**

BIAS-MOTIVATED INCIDENT MEASURES	TOTAL COLLECTIONS	NATIONAL SURVEYS	POPULATION SURVEILLANCE	EVALUATION RESEARCH	PROGRAM MONITORING	ADMINISTRATIVE
Total collections	23	4	3	6	1	9
Sexual orientation	15	3	1	5	1	5
Gender identity	22	4	3	6	1	8

## REMOVAL MECHANISMS

The majority of removals were enacted through non-substantive change requests (NSCRs; see Methods for detailed description). This made up approximately 83% of all documented removals. In addition, 10 collections containing SOGI measures were discontinued in 2025 (Table 5).<sup>10</sup>

**Table 5. Federal SOGI data removal mechanisms**

REMOVAL MECHANISM	N = 370
Non-substantive change request (NSCR)	300
Federal Register Notice (FRN)	34
Other	26
Collection discontinued*	10

Note: FRN = includes “FRN presumptives”; Other = Removal was evident in other documentation, such as Reginfo or public-facing questionnaires, or in “presumptive” data collections, which, for example, excluded SOGI data in published results on public-facing websites. \*Data collection, which contained SOGI measures and was discontinued after January 30th, 2025.

## METHODS

To systematically document and track the removal of sexual orientation and gender identity measures, we developed a database of federal data collections where SOGI-related measures had been added, or where such measures were proposed or tested. Evidence of the removal of these measures was identified through publicly available resources, primarily through [RegInfo.gov](#), where, under the Paperwork Reduction Act (PRA), federal agencies are legally mandated to publicly document and obtain approval before collecting information from the public, including when making changes to previously approved collections.<sup>11</sup> Supplemental evidence was gathered via public-facing agency websites, publicly available survey documentation, and news reports. In addition to our independent analysis, we relied on evidence of removals associated with the executive order reported by [Dataindex.us](#).<sup>12</sup>

For each data collection instrument that underwent removals of SOGI measures, we documented the regulatory context, collection type, pre-2025 SOGI measures, post-EO SOGI measures, and the mechanism by which SOGI measures were removed. Where possible, we verified each modification using official agency documentation and reviewed the affected questionnaires directly, comparing versions before and after the executive order. A removal is considered “confirmed” if there is direct evidence of questionnaire modification, whether in Reginfo or in the public domain. Otherwise, it is categorized as presumptive or inconclusive.

In addition, many studies and programs use more than one survey instrument, and it is common for multiple collections to fall under a single OMB control number. As a guiding principle, we counted groups of instruments as one collection when there was no substantive difference between them; for example, a baseline and a follow-up survey, or an intake form and a feedback form, were counted as a single collection under that study or program. However, when a collection includes separate instruments for distinct populations (such as youth and adults) or includes a supplemental survey on a different topic, we treated these as separate collections and counted them individually.

## REGULATORY CONTEXT AND COLLECTION TYPE

To help clarify the legal and policy frameworks guiding each data collection, we verified the agency or agencies responsible for them, the authorizing statute, if applicable, and whether SOGI data collection was explicitly mandated under a specific provision of law.<sup>13</sup> Additionally, data collections were categorized to reflect their primary purpose, scope, and use. They were sorted into one of the following categories:

- **National survey.** Ongoing, nationally representative household or individual surveys that produce publicly reported statistics and widely used research data, such as the American Housing Survey (AHS), a longitudinal probability survey conducted since 1973, designed to track housing

---

<sup>11</sup> “The PRA was designed, among other things, to “ensure the greatest possible public benefit from and maximize the utility of information created, collected, maintained, used, shared and disseminated by or for the Federal Government” and to “improve the quality and use of Federal information to strengthen decision making, accountability, and openness in Government and society.” 44 U.S.C. § 3501.” U.S. Congress. (1995). *Paperwork Reduction Act of 1995* (Pub. L. No. 104-13).; [Digital.gov](#) (n.a.). A guide to the Paperwork Reduction Act. <https://pra.digital.gov/>; U.S. General Services Administration. (n.d.). *Frequently asked questions (FAQ)*. [RegInfo.gov](#). <https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp>

<sup>13</sup> For analysis by agency see Klein. M. (2025). *100s of Information Collections Influenced by Presidential Actions in the First 6 Months of the Trump Administration*. [Dataindex](#). <https://dataindex.us/newsletter/article/4a21cae3-cfcf-4e53-b174-097c9dda5dec>

and households over time.<sup>14</sup> This category also includes federally funded but independently administered studies, such as the General Social Survey, a nationally representative survey funded by the National Science Foundation and conducted since 1972 to monitor attitudes and behaviors of the American public over time.<sup>15</sup>

- **Population surveillance.** Ongoing, population-based surveillance systems and administrative datasets that provide foundational data for establishing national baselines and monitoring system-level trends. For example, the Homeless Management Information System (HMIS), which maintains administrative data on demographics, service use, and program outcomes among people experiencing housing insecurity.<sup>16</sup>
- **Evaluation research.** Targeted (one-time or ongoing) data collections designed to assess the effectiveness, impact, or outcomes of specific federal programs, interventions, or initiatives such as the Essentials for Childhood: Preventing Adverse Childhood Experiences (ACEs) through Data to Action Program, launched in 2023 in partnership with state and local health entities to reduce ACEs, including by enhancing data collection and refining interventions.<sup>17</sup> This category also includes research and development collections, which are routinely used to test and refine survey instruments, such as the Research and Development Survey (RANDS).<sup>18</sup>
- **Programmatic monitoring.** Routine data collection used to track service delivery, grantee performance, and participant experiences for operational oversight and program management, such as the Ryan White HIV/AIDS Program (RWHAP), which, since 1990, has funded government and community organizations nationwide to provide direct medical care and supportive services to low-income individuals diagnosed with HIV, effectively slowing the HIV epidemic in the U.S.<sup>19</sup>
- **Administrative.** Forms and records where information is collected primarily for operational purposes, such as the G-325A, Biographic Information (for Deferred Action) application form, which is used by undocumented immigrants in the U.S. to request temporary postponement of deportation proceedings, including humanitarian or family-related circumstances.<sup>20</sup> We also included administrative databases such as the US Core Data for Interoperability (USCDI) in this category.<sup>21</sup>

## MEASURES TRACKED

We documented measures of sexual orientation and gender identity (SOGI) that were included in federal data collections prior to January 2025. We also documented data collections that had proposed, planned, or tested SOGI measures, even when such measures had not yet been implemented.

### Sexual Orientation

We documented any questions that assessed sexual orientation, same-sex partnership status, sexual and gender minority identity as single, combined measures such as “identification with the LGBT community,” and data collections that assess SOGI indirectly by asking the programs or organizations they work with or manage whether SOGI data are collected. For example:

- Many data collections, such as the HHS’s Domestic Victims of Human Trafficking (DVHT) program, included *sexual orientation* as a standard data element in their client characteristics. Response options in DVHT included:<sup>22</sup>
  - Straight or heterosexual
  - Gay
  - Lesbian
  - Bisexual
  - Client uses a different term (specify)
- Data collections, such as the Decennial Census, Current Population Survey (CPS), and Survey of Income and Program Participation (SIPP), assess self-reported *same-sex partnership status*, allowing respondents to more accurately describe their relationships to members of their household. Since 2014, the SIPP asks, “How are you related to (reference person’s name)?” Response options include:<sup>23</sup>
  - Opposite sex husband/wife/spouse
  - Opposite sex unmarried partner
  - Same-sex husband/wife/spouse, or
  - Same-sex unmarried partner
- Some data collections asked about *sexual and gender minority identity* as a single, combined measure, such as the DOL’s Workforce Recruitment Program (WRP), which asked: “Do you identify as LGBTQIA+?” Response options included: Yes, No, I am not sure.<sup>24</sup>

## Gender Identity

We documented measures of gender identity and categorized them into two groups: data collections that assessed gender identity using one question (one-step method) and those that assessed gender identity using two questions: sex at birth and gender (two-step method).

### Gender Identity One-Step Method

In the one-step method, gender is asked through a single question that allows self-identification beyond male and female, such as including transgender and/or nonbinary as response options.<sup>25</sup> For example:

The National Health Interview Survey has asked about sexual orientation since 2013; in 2023, they began asking about gender identity: "For this next question, you may select more than one answer. Do you currently describe yourself as male, female, transgender, nonbinary, or another gender?"<sup>26</sup>

- Since 2022, the U.S. passport application form has allowed selection for gender markers "M" (male), "F" (female), and "X" (unspecified or another gender identity).<sup>27</sup>

Some data collections include a single transgender identity item in their questionnaires. For example:

- Since 2014, the Behavioral Risk Factor Surveillance System (BRFSS) asked, "Do you consider yourself to be transgender?"<sup>28</sup>
  - Yes, Transgender, male-to-female
  - Yes, Transgender, female-to-male
  - Yes, Transgender, gender nonconforming
  - No
  - Don't know/not sure
- Since 2013, the National Violent Death Reporting System (NVDRS) has included a checkbox labeled "transgender" if "victim self-identifies as transgender or a friend/family member report that the victim self-identified as transgender."<sup>29</sup>

---

<sup>25</sup> Exclusive of response options such as, for example, "refused," "unknown," or "don't know".

## Gender Identity Two-Step

In the two-step method for measuring gender identity, “sex” and “gender” are asked as two separate questions, usually by first asking for respondents’ sex at birth, followed by a question about their current gender identity. This method, first introduced in 1997, has been tested over the course of two decades, and a 2022 consensus report produced by the National Academies of Sciences, Engineering, and Medicine (NASEM) used the evidence base for the two-step method to recommend its further adoption.<sup>30</sup> Examples of data collection instruments using the two-step method include:

In the two-step method for measuring gender identity, “sex” and “gender” are asked as two separate questions, usually by first asking for respondents’ sex at birth, followed by a question about their current gender identity.

- The National Inmate Survey (NIS) began asking about gender identity in 2007, with the two-step question implemented in 2023 to ask: “What sex were you assigned at birth on your original birth certificate?” “Male,” or “Female.” This was followed by “Do you currently think of yourself as...?” With response options:<sup>31</sup>
  - Male
  - Female
  - Transgender
  - None of these
- The Department of Defense’s Gender Relations Surveys asked, “What sex were you assigned at birth, on your original birth certificate? *Mark one.*” “Male,” or “Female.” Followed by, “Do you currently describe yourself as male, female, or transgender? *Mark one.*”<sup>32</sup>

We also documented several data collections with measures that included “intersex” as a response option, primarily for the question on “assigned sex at birth”, and at least two that included it as a response option for “gender identity.”<sup>33</sup>

## Bias-Motivated Incidents

In addition to demographic SOGI questions, questions assessing reasons for incidents of bias, such as discrimination experiences and hate crimes, where sexual orientation and gender identity were included as reasons, were also tracked. For example:

- The Medicare Current Beneficiary Survey (MCBS) asked "...did anyone from a clinic, emergency room, or doctor's office where you got care treat you in an unfair or insensitive way because of any of the following things about you..." Response options included:<sup>34</sup>
  - Gender or gender identity?
  - Sexual orientation?
- The Sudden Death in the Young Registry (SDY) asks those completing a case report to "[p]lease indicate all stressors that were present for this child around the time of death."<sup>35</sup>
  - Stress due to gender identity (The child experienced stress due to coming out or to the responses of others related to their gender identity).
  - Stress due to sexual orientation (The child experienced stress due to coming out or to the responses of others related to their sexual orientation).

## HOW MEASURES WERE REMOVED IN RESPONSE TO EXECUTIVE ORDER

We considered a "removal" to be an instance where a SOGI measure had been included in an existing data collection or had been proposed or tested for inclusion in an upcoming iteration and was subsequently deleted from the data collection or proposed data collection, or for which plans to test or implement the measure were withdrawn. Almost without exception, when sexual orientation measures were removed, they were removed without replacement. Removal of a one-step gender identity question typically resulted in replacement with a simplified "sex" question with binary response options (male or female). Removal of a two-step gender identity question typically resulted in the deletion of the "gender identity" component of the two-step and retention of the "sex" component (removing any answer options outside of male and female, including intersex).<sup>36</sup> For example:

- The sexual orientation measure in the Runaway and Homeless Youth Homeless Management Information System (RHY – HMIS), which had previously been a required data element, was

<sup>34</sup> Office of Justice Programs (OJP). (2024). *Survey on Sexual Victimization. Questionnaire*. U.S. Department of Justice. [https://www.reginfo.gov/public/do/PRAList?ref\\_nbr=202405-1121-001](https://www.reginfo.gov/public/do/PRAList?ref_nbr=202405-1121-001)

<sup>37</sup> "Consistent with the E.O., the Department follows the expanded sex-based definitions issued by the Department of Health and Human Services (HHS), which recognizes that there are only two sexes, male and female, as characterized by the individual's reproductive system, and that rare disorders of sexual development do not constitute a third sex. The Office of Personnel Management (OPM) has also issued guidance to ensure consistency across the Federal government." Department of State. (2025, June 18). *OMB No 1405-0004\_FRN 30 Day FRN\_PRA Supp Stment*. [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202502-1405-001](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202502-1405-001)

removed in November 2025, with agency documentation stating, "Sexual orientation - RETIRE to be compliant with the current Administration's Executive Orders."<sup>37</sup>

- In the National Survey on Drug Use and Health (NSDUH), the gender identity question which asked "Do you describe yourself as male, female, transgender, or do you use a different term?" was deleted, and the sex at birth question was modified from "What sex were you assigned at birth, on your original birth certificate?" to "Are you male or female?"<sup>38</sup>
- SOGI response options were also deleted from "reasons for bias incident" questions, such as in the Equal Employment Opportunity (EEO) Complaint Form, where "minor changes were made to previously approved EEO forms to reflect the removal of gender identity and sexual orientation as subcategories of sex discrimination."<sup>39</sup> Or in the National Survey of Family Growth (NSFG), which deleted the question: "During your life, how often have you felt that you were treated badly or unfairly because of your gender identity or sexual orientation?"<sup>40</sup>

## REMOVAL MECHANISMS

We identified several procedural mechanisms through which SOGI measures were removed. These include modifications to data collections categorized as "*de minimis*," "non-substantive changes," "substantive changes" via Federal Register notice, discontinuations of complete collections, and suspected or unverified removals evidenced by changes to secondary products, such as reports and other publications. For modifications to collections that are not considered *de minimis*, the Paperwork Reduction Act (PRA) requires federal agencies to obtain approval from OMB's Office of Information and Regulatory Affairs (OIRA), which is requested by submitting memoranda that describe and justify the changes.<sup>41</sup> Most removals examined in this report were identified and analyzed using documents uploaded via [RegInfo.gov](https://www.reginfo.gov) as part of this process (found within the "supporting documentation" of a specific collection). The categories of removal are described further below.

<sup>37</sup> Gender Identity was also removed from this collection. Administration for Children and Families (ACF). (2025, November 14). *Non-Substantive Change Request*. Department of Health and Human Services (HHS). [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202508-0970-010](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202508-0970-010); Administration for Children and Families (ACF). <sup>41</sup> "To ensure that the public record is accurate, agencies must submit, and OMB must review, documentation of all proposed revisions to an active collection before those revisions may be implemented." Sunstein, C. R. (2010, April 7). *Information collection under the Paperwork Reduction Act [Memorandum]*. Office of Management and Budget. [https://obamawhitehouse.archives.gov/sites/default/files/omb/assets/infoeg/PRAPrimer\\_04072010.pdf](https://obamawhitehouse.archives.gov/sites/default/files/omb/assets/infoeg/PRAPrimer_04072010.pdf)

## De Minimis

"A de minimis change to a collection affects the 'look and feel' but does not change data elements collected or increase the collection's burden ... does not need approval by OIRA before implementation and may be completed immediately."<sup>42</sup> Pursuant to the OMB memo issued in February 2025 regarding the implementation of Executive Order 14,168, modification to data collections where a gender question's response options included "male" and "female" only and the word "gender" is simply being replaced with the word "sex" are *de minimis* and may be made without OIRA approval.<sup>43</sup> We encountered many such changes in our research; however, these changes do not substantively alter the information we are able to learn about LGBT communities from a particular collection. Therefore, we excluded this type of modification from our analysis and our tallies.

## Non-Substantive Change Requests (NSCRs)

"Unlike the de minimis changes, agencies submit, and OMB reviews, documentation for the proposed revisions to an active collection before those revisions may be implemented."<sup>44</sup> Pursuant to the OMB memo, the majority of the SOGI measure removals were requested through this mechanism.<sup>45</sup> [Reginfo.gov](https://www.reginfo.gov) frames non-substantive change requests (NSCR) this way: "Although such requests may result in changes in burden, they are deemed by OMB to be technical or ministerial."<sup>46</sup> Similarly, OMB guidance prior to 2025 instructed agencies to use NCSRs for "insignificant" changes.<sup>47</sup> In its memo regarding Executive Order 14,168, the OMB clarified that removal of an answer option does not necessarily constitute a substantive change to a collection and therefore does not require a period of public comment.<sup>48</sup> Accordingly, the guidance permits agencies to modify collections that have gender or sex

<sup>42</sup> Shelanski, H. (2016, July 22). *Memorandum for the heads of executive departments and agencies and independent regulatory agencies: Flexibilities under the Paperwork Reduction Act for Compliance with Information Collection Requirements*. OIRA, OMB. [https://obamawhitehouse.archives.gov/sites/default/files/omb/foreg/pr\\_a\\_flexibilities\\_memo\\_7\\_22\\_16\\_final.pdf](https://obamawhitehouse.archives.gov/sites/default/files/omb/foreg/pr_a_flexibilities_memo_7_22_16_final.pdf)

<sup>43</sup> "Various agencies have forms that intend to request a respondent's biological sex and provide response options in compliance with Exec. Order 14,168 (i.e., female, male), but the question includes terms not in compliance with the executive order (e.g., "What is your gender?"). In these cases, an agency may update the question to request "sex" instead of "gender" through a de minimis change, without further OIRA approval, as long as the response options set does not change...If the change involves adding or eliminating question response options, changing a question's purpose, eliminating a question, or adding a question, then it is not a de minimis change. Only a change that simply updates the terms in a question stem, but not its response options, is considered de minimis." Mancini, D. (2025, February 11). *Memorandum: Guidance on implementing section 3(e) of Executive Order 14168 in accordance with the Paperwork Reduction Act and the Privacy Act*. Office of Information and Regulatory Affairs, Office of Management and Budget. (Document not publicly available among OMB memos; found among ICR supporting documentation on Reginfo) [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202507-1601-002](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202507-1601-002).

<sup>44</sup> See footnote 42 (Shelanski, 2016).

<sup>45</sup> OMB guidance states that, "In the context of changes pursuant to E.O. 14168, OIRA expects many collections can be updated through non-substantive change requests that are consistent with previous OIRA guidance." See footnote 43 (Mancini, 2025).

<sup>46</sup> [Reginfo.gov](https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg_rule). (n.d.). Q&A: *What are the different types of information collection requests displayed on the ICR Dashboard?* [https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg\\_rule](https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg_rule). Accessed 2/1/2026.

<sup>47</sup> See footnote 42 (Shelanski, 2016).

<sup>48</sup> "As described in previous OIRA guidance, a non-substantive change must be approved by OIRA, but the agency does not need to first seek public comment to complete the change. Non-substantive changes are more significant than those considered de minimis, but they generally do not introduce new concepts or measures that have not been subject to public notice and comment. Whether a change to a collection is non-substantive depends on a variety of factors, including the purpose of the collection and the impact of the change on the collection's utility. A similar change may be considered non-substantive in the context of one collection, but not another...Generally, non-substantive changes may not be appropriate for collections where the change substantially alters the utility of the collection or where the removal of a response option or question could raise legal, regulatory, statutory, or statistical issues. For example, non-substantive changes may not be appropriate for collections that have been subject to litigation; collections associated with rulemaking (where the regulation specifies "gender" questions); or collections that may have statutory reporting

questions with response options other than male and female by removing those “extra” response options. OMB advises that agencies are also permitted to remove an entire question as a non-substantive change if the collection contains more than one sex or gender question, such as a two-step gender identity measure. In other words, agencies are encouraged to treat sex and gender measures as redundant constructs rather than distinct variables.

Additionally, sexual orientation questions were removed from numerous data collections via NCSRs. Executive Order 14,168 and the subsequent OMB memo do not require sexual orientation measures to be removed, nor does the memo authorize such removals or provide guidance categorizing sexual orientation removals as non-substantive. Few rationales were offered by agencies making these particular removals, though some NCSRs referenced Executive Order 14,151, which requires removal of Diversity, Equity, and Inclusion (DEI)-related language, and Executive Order 14,148, which rescinds President Biden’s Executive Orders promoting nondiscrimination and equity for LGBT people.<sup>49</sup> For example, in the NSCR for the Survey of Earned Doctorates, it states, “NCSES [National Center for Science and Engineering Statistics] requests the suspension of the current ongoing collection of sexual orientation and gender identity (SOGI) questions, and a revision of the sex assigned at birth question. The SOGI items were added to the 2025 Survey of Earned Doctorates (SED) to comply with EO 13985 and 14075, which have now been revoked by EO 14148. Removing the SOGI items and revising the sex assigned at birth item as described below will enable compliance with EO 14148 and 14168.”<sup>50</sup>

## Federal Register Notices (FRNs)

The Federal Register is the U.S. government’s official daily publication for documenting a wide range of executive branch actions.<sup>51</sup> Under the PRA, many types of agency actions must go through a formal process that requires publication in the Federal Register.<sup>52</sup> This process, sometimes called “notice-and-comment,” applies to new data collections, data collections that have expired or are close to expiring to extend the life of the data collection (also known as an “extension without change”), data collections that were previously approved but discontinued/expired (also known as “Reinstatements with and without change”), or requests for a “substantive” change to the elements of the data collection (also known as a “revision” request).<sup>53</sup> For all these types of changes, agencies are required to publish a Federal Register

---

requirements for data on a respondent’s “gender.” Further, where collections ask about a respondent’s “gender” for statistical purposes, agencies are encouraged to consult with their OIRA Desk Officer to clarify when a non-substantive change may appropriate.” See footnote 43 (Mancini, 2025).

<sup>49</sup> Executive Order 14151: *Ending Radical and Wasteful Government DEI Programs and Preferencing*, 90 Fed. Reg. 8339 (Jan. 29, 2025); EO 14148, *Initial Rescissions of Harmful Executive Orders and Actions*, rescinds several executive orders related to SOGI, including: Executive Order 14075 (June 15, 2022), *Advancing Equality for Lesbian, Gay, Bisexual, Transgender, Queer, and Intersex Individuals*; Executive Order 13988 (January 20, 2021), *Preventing and Combating Discrimination on the Basis of Gender Identity or Sexual Orientation*; and Executive Order 14021 (March 8, 2021), *Guaranteeing an Educational Environment Free From Discrimination on the Basis of Sex, Including Sexual Orientation or Gender Identity*. Executive Order 14148: Initial rescissions of harmful executive orders and actions, 90 Fed. Reg. 8237 (Jan. 28, 2025). <https://www.federalregister.gov/documents/2025/01/28/2025-01901/initial-rescissions-of-harmful-executive-orders-and-actions>

<sup>50</sup> National Science Foundation (NSF). (2025, March 31). 2025 Survey of Earned Doctorates: Non-substantive change request. [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202503-3145-003](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202503-3145-003)

<sup>51</sup> Reginfo. FAQ: *What is the Federal Register?* [https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg\\_rule](https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg_rule). Accessed 2/3/26.

<sup>52</sup> 44 U.S.C. § 3507.

<sup>53</sup> Reginfo. FAQ: *What are the different types of information collection requests displayed on the ICR Dashboard?* [https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#icr\\_dashboard](https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#icr_dashboard). Accessed 2/1/2026.

Notice (FRN), hold two periods of public comment, and then wait for approval by the OMB.<sup>54</sup> Agencies may choose to revise proposals in response to public comments; however, both the agencies and OMB are only required to “consider” these concerns. For example, in the second FRN for U.S. passport applications, the Department of State stated its intention to remove the “X” gender marker. Following the public comment period, the agency responded by removing the “X” gender marker as planned, while noting: “The Department received 1,620 responsive comments, one of which was in support of these changes. The majority of comments were opposed to these changes.”<sup>55</sup>

While we documented many removals of SOGI data elements from data collections that went through this process, the majority of SOGI removals were not explicitly proposed or discussed in the Federal Register. In some cases, the removal was described in supporting documents. (e.g., “Supporting Statement A”). In other removals included as part of FRN publications, measure removals were identifiable only through direct comparison of questionnaire versions showing that the item was modified or removed. These are categorized as FRN presumptives.

## Discontinuations

When a data collection is no longer in use, agencies are required to request that the collection be discontinued. However, this process is not as onerous as an NSCR or substantive change request.<sup>56</sup> Collection discontinuation is shown on the “history” page for a particular OMB number, and the OMB approval can be found in the “Notice of Action” document uploaded to the landing page for that particular request. Several collections that formerly contained SOGI measures were identified and are currently categorized as discontinued (See Findings: Removal Mechanisms). Documentation stating the reason for discontinuation has not been found for any of the collections in this report.<sup>57</sup>

## Presumptive Removals

Presumptive removals are collections for which we do not have sufficient official documentation confirming the removal of SOGI from a collection, but where we believe it is likely that the measures

<sup>54</sup> 44 U.S.C. § 3507; “If the agency is considering significant or substantive revisions to the collection, it must provide the public with an opportunity to comment on the proposed revisions, as it would with a new collection.” See footnote 41 (Sunstein, 2010); “The following process is used to obtain OMB approval for an information collection. 1. The agency develops an information collection that it wishes to implement. 2. The agency publishes a *Federal Register* notice about the proposed information collection and provides the public with 60 days to provide comment on the proposed collection. 3. The agency considers the public’s comments and makes changes as appropriate to address concerns raised by the public. 4. The agency submits the ICR to OMB for review and publishes a second *Federal Register* notice announcing the start of OMB’s review. The second notice provides the public with an additional 30 days to provide comments. 5. After reviewing the ICR and considering public comments, OIRA concludes its review by approving the collection or taking one of the other actions noted above.” [Reginfo.gov](https://www.reginfo.gov/). (n.d.). *FAQ: How does an agency obtain OMB approval of an information collection?* [https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg\\_rule](https://www.reginfo.gov/public/jsp/Utilities/faq.myjsp#reg_rule). Accessed 2/1/2026.

<sup>55</sup> Department of State (2025, June 18). Application for a U.S. Passport: Supporting statement for paperwork reduction act submission. [https://www.reginfo.gov/public/do/PRAViewDocument?ref\\_nbr=202502-1405-001](https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=202502-1405-001)

<sup>56</sup> “The Paperwork Reduction Act requires collections to be renewed at least every three years. To ensure agencies are not allowing active collections to expire improperly, OMB’s Office of Information and Regulatory Affairs (OIRA) requires agencies to submit a discontinuation request when they end the use of a collection.” Office of Management and Budget. (2023). *Information collection budget of the United States government, 2018–2021*. Executive Office of the President. <https://bidenwhitehouse.archives.gov/wp-content/uploads/2023/05/2018-2021-ICB.pdf>; “Agencies may also discontinue collections at any time by submitting a short request to OMB.” See footnote 41 (Sunstein, 2010).

<sup>57</sup> OMB. (2004). *Paperwork Reduction Act Collection Discontinuation Form [OMB FORM 83-D]* (which includes space to provide reason for discontinuation). <https://www.energy.gov/cio/articles/omb83-d-discontinuance-form>

have been removed. In many cases, the collection's page on RegInfo has not been updated; however, the collection's public-facing website indicates removal, usually through published research results. Many of these collections modified previously released reports or data products to remove SOGI results, which we verified using the Internet Archive's Wayback Machine.<sup>58</sup> In other instances, agencies published new reports in 2025 that excluded SOGI measures, even though they usually include them. These removals are sometimes noted by the report authors; for example, a National Child and Adolescent Wellbeing Survey (NCAWS) report published in July 2025 includes a data note which states, "Sex is reported based on the Executive Order 14,168."<sup>59</sup>

## Inconclusive Evidence

There were several collections for which the continued inclusion or removal of SOGI measures was inconclusive based on the evidence available at the time of this report. In these cases, we were able to identify that SOGI measures had at some point been included or tested for inclusion, but we could not determine whether the collection ultimately retained them in 2025, or whether steps were taken to remove the measures. Some of these collections appeared to be administered only periodically, and we were unable to determine whether they had been permanently discontinued or altered in response to Executive Order 14,168 or other recent policy directives. We continue to monitor these collections.

## DISCUSSION

Federal agencies had implemented sexual orientation and gender identity (SOGI) measures, inclusive language, and related protections across a wide range of data collections. As a result, federal SOGI data has informed policymakers, researchers, and service providers, enabling them to identify disparities, allocate resources equitably, and design programs that meet the needs of LGBT people, a group that constitutes a substantial portion of the population and that research has shown to be disproportionately at risk for economic insecurity, health disparities, and victimization.<sup>60</sup>

Much of this work is now being reversed under President Trump's executive orders. Removing SOGI measures from federal datasets undermines the ability to monitor and address inequities in health, employment, economic security, victimization, social services, and other well-established indicators of well-being. In practical terms, these decisions affect the health and safety of individuals and families, with consequences that span multiple domains and will continue to unfold over time as existing data becomes outdated and new data is not collected.

Reliable data collection plays a fundamental role in the democratic administration of the U.S. government. To this end, OMB has previously advised:

*Federal information is both a strategic asset and a valuable national resource. It enables the Government to carry out its mission and programs effectively. It provides the public with knowledge of the Government, society, economy, and environment – past, present, and future. Federal information is also a means to ensure the accountability of Government, to manage the Government's operations, and to maintain and enhance the performance of the economy, the public health, and welfare. Appropriate access to Federal information significantly enhances the value of the information and the return on the Nation's investment in its creation ... Agencies have a responsibility to provide information to the public consistent with their missions and subject to Federal law and policy. Agencies will discharge this responsibility by: a) Publishing public information online in a manner that promotes analysis and reuse for the widest possible range of purposes, meaning that the information is publicly accessible, machine-readable, appropriately described, complete, and timely.<sup>61</sup>*

## ABOUT THE WILLIAMS INSTITUTE

The Williams Institute is dedicated to conducting rigorous, independent research on sexual orientation and gender identity law and public policy. A think tank at UCLA Law, the Williams Institute produces high-quality research with real-world relevance and disseminates it to judges, legislators, policymakers, media, and the public. These studies can be accessed at the Williams Institute website.
