Using data from the U.S. Census Bureau, this report provides demographic and economic information about same-sex couples and same-sex couples raising children in Hawaii. We compare same-sex “unmarried partners,” which the Census Bureau defines as an unmarried couple who “shares living quarters and has a close personal relationship,” to different-sex married couples in Hawaii.1

In many ways, the more than 3,200 same-sex couples living in Hawaii are similar to married couples. According to Census 2000, they live throughout the State, are racially and ethnically diverse, have partners who depend upon one another financially, and actively participate in Hawaii’s economy. Census data also show that about 21% of same-sex couples in Hawaii are raising children, and they have similar economic resources to provide for their families as married couples.

**SAME-SEX COUPLES AND THE LGB POPULATION IN HAWAII**

- In 2000, there were 2,389 same-sex couples living in Hawaii.2

- By 2005, the number of same-sex couples increased to 3,262.3 This increase likely reflects same-sex couples’ growing willingness to disclose their partnerships on government surveys.

- In 2005, there were an estimated 41,785 gay, lesbian, and bisexual people (single and coupled) living in Hawaii.4

**INDIVIDUALS IN SAME-SEX COUPLES ARE DEMOGRAPHICALLY AND GEOGRAPHICALLY DIVERSE**

- There are more male same-sex couples (52%) than female same-sex couples (48%) in Hawaii.5

- Individuals in same-sex couples are, on average, 43 years old, and significantly younger than individuals in married couples (49 years old) in Hawaii.

- Same-sex couples live in all but one of the counties in Hawaii and constitute 1.0% of coupled households and 0.6% of all households in the state. Honolulu County reported the most same-sex couples with 1,520 couples (0.53% of all households in the county), followed by Maui County with 373 couples (0.86%), and Hawaii County with 368 couples (0.69%). The counties with the highest percentage of same-sex couples are Maui County (0.86% of all county households), Hawaii County (0.69%), and Kauai County (0.63%).6

- Hawaii’s same-sex couples are racially and ethnically diverse: 54% of same-sex couples are nonwhite in Hawaii.

**PEOPLE IN SAME-SEX COUPLES ARE ACTIVELY ENGAGED IN THE STATE ECONOMY**

- Individuals in same-sex couples in Hawaii are significantly more likely to be employed than married individuals: 77% of individuals in same-sex couples are employed, compared to 60% of married individuals.
• Contrary to popular stereotypes, the annual earnings of individuals in same-sex couples are lower than those of married individuals. On average, men in same-sex couples in Hawaii earn $33,542 each year, significantly less than $44,872 for married men. The median income of men in same-sex couples in Hawaii is $25,000, or 31% less than that of married men ($36,000).

• On average, women in same-sex couples in Hawaii earn $26,329 each year, less than $27,715 for married women. The median income of women in same-sex couples in Hawaii is $20,000, or 17% less than that of married women ($24,000).

• Individuals in same-sex couples in Hawaii are more likely to work in the private sector: 66% of individuals in same-sex couples work in the private sector, compared to 63% of married individuals; 17% of individuals in same-sex couples work in the public sector, compared to 24% of married individuals; and 16% of individuals in same-sex couples are self-employed, compared to 13% of married individuals.

• Individuals in same-sex couples are significantly more likely to have a college degree: 41% of individuals in same-sex couples and 28% of married individuals have earned a college degree.

• Despite the military’s historic policies of excluding gay men and lesbians from service, individuals in same-sex couples have served in the military: 11% of individuals in same-sex couples are veterans, compared to 17% of married individuals.

SAME-SEX PARTNERS IN HAWAII DEPEND UPON ONE ANOTHER IN WAYS THAT ARE SIMILAR TO MARRIED COUPLES

• Couples in which one partner does not work or earns significantly less than the other partner may indicate financial interdependence. 30% of same-sex couples have only one wage earner, compared to 29% of married couples.

• The mean income gap between same-sex partners is $16,637, compared to $22,408 for married spouses.

• 26% of same-sex couples have at least one partner who is disabled, compared to 28% of married couples.

• 14% of same-sex couples have at least one partner who is age 65 or older, compared to 22% of married couples.

SAME-SEX HOUSEHOLDS IN HAWAII HAVE SIMILAR ECONOMIC RESOURCES AS MARRIED HOUSEHOLDS

• The median income of same-sex coupled households in Hawaii is $65,090, compared to $65,000 for married couples. The average household income of same-sex couples is $79,060, compared to $78,070 for married couples.

• Same-sex couples are significantly less likely than married couples to own their homes: 44% of same-sex couples in Hawaii own their home, compared to 66% of married couples.

SAME-SEX COUPLES ARE RAISING CHILDREN IN HAWAII WITH SIMILAR ECONOMIC RESOURCES AS MARRIED PARENTS

• 21% of same-sex couples in Hawaii are raising children under the age of 18.

• As of 2005, an estimated 1,164 of Hawaii’s children are living in households headed by same-sex couples.7

• In Hawaii, married and same-sex couples with children under 18 in the home have, on average, two children.

• More than 1% of Hawaii’s adopted children (or 95 children) live with a lesbian or gay parent.8

• 46% of Hawaii’s same-sex parents have only one wage earner, compared to 30% of married parents.
• Same-sex parents in Hawaii have similar financial resources to support their children as married parents. The median household income of same-sex couples with children is $55,900, compared to $64,820 for married parents. The average household income of same-sex couples with children is $79,258, compared to $77,050 for married parents.

• While 45% of same-sex couples with children own their home, a larger percentage of married parents (60%) own their home.

CONCLUSION

Census data provide valuable information about gay and lesbian couples in Hawaii. In many respects, Hawaii’s same-sex couples are similar to married couples. Many same-sex couples in Hawaii are raising children, and they have economic resources similar to married couples to provide for their families.

About the Authors

Adam P. Romero is Public Policy Fellow at the Williams Institute, UCLA School of Law. J.D. Yale Law School; A.B., summa cum laude, Cornell University. His current research examines the significance of family in society and law, especially as relevant to disabled adults without family.

Clifford J. Rosky is Research Fellow at the Williams Institute, UCLA School of Law. J.D. Yale Law School; B.A., summa cum laude, Amherst College. His current research examines the significance of gender in family law cases involving lesbian and gay parents.

M.V. Lee Badgett is Research Director at The Williams Institute, UCLA School of Law, and Director of the Center for Public Policy and Administration at the University of Massachusetts Amherst, where she is also on the faculty of the Department of Economics. She studies family policy and employment discrimination related to sexual orientation.

Gary J. Gates is Senior Research Fellow at The Williams Institute, UCLA School of Law. He studies the demographic and economic characteristics of the lesbian and gay population.

---

1 Unless otherwise noted, we calculate the demographic characteristics from the Census 2000 Public Use Microdata Sample (5% file) available from the U.S. Census Bureau. For a detailed discussion of the Census 2000 methodology used in this report, see Census Snapshot: Methods Note, available at http://www.law.ucla.edu/williamsinstitute/publications/MethodologicalDetailsForCensusSnapshots.pdf. In estimating numbers of same-sex couples and children raised by same-sex couples, however, we use the total number of same-sex couples from 2005 and the proportion of couples with children from 2000 in order to provide a more up-to-date estimate.

3 Gary J. Gates, The Williams Institute, Same-sex Couples and the Gay, Lesbian, Bisexual Population: New Estimates from the American Community Survey, p. 11, apx. 1, available at http://www.law.ucla.edu/williamsinstitute/publications/SameSexCouplesandGLBpopACS.pdf. Sample sizes for individual states in 2005 are not sufficiently large for the analyses presented in this report, we therefore use data from Census 2000 where samples are on average five times larger than 2005.
